VLADIVOSTOK, Siberia.—Conges or waiting in the bay to enter the har-bor. Pier facilities are lacking to ac-contimodate these steamers. The transa on the piers are not heavy enough to tift locomotives and other heavy weights, and consequently light-ers must be utilized for this purpose. As there are only sufficient lighters to unload four steamers, the handling of locomotives is greatly delayed.

Four hundred and fifty American locomotives were sold to Russia for use in speeding up war supplies, and so far less than 50 of these have been unloaded at Vladivostok. American manufacturers are also sending 20,000 steel cars to Vladivostok. Heavy floating cranes were brought from Japan to handle the war supplies but it is almost impossible to move these in the ice, and they are of an old type not well adapted to the present work.

t well adapted to the present work.

Because of delay, demurrage arges are piling up against the eight. The shores of the harbor are blocked with cargo, and it seems im-possible to get cars to move this out. The government says it has 3060 cars at Lake Baikal, but these are not com-ing with any regularity to Vladivostok and the situation seems to grow more

Barbed wire, cotton and rails make up a great part of the cargo which is now reaching here. Various departnow reaching here. Various departments which are handling the cargo, insist on different sorts of supplies being taken to different piers. The result is that some ships unload less than 100 tons a day, and in many cases the demurrage charges against one ship reach \$1,500 a day.

The Inter-Island steamer Claudine arrived this morning from Maui, bringing passengers and freight. Inward cargo included 874 sacks of sugar, 5 of corn, 24 of empty bottles, 7 of the part of chickens, 83 bales and 98 packages of sundries.
